TECHNICAL SKILLS

Programming

- Python, Dart, C#
- OOP, Functions, Inheritance

CS Fundamentals

- Data Structures, Algorithms
- Problem-solving, Prolog

Web & Databases

- HTML, CSS, SQL
- Database Fundamentals

Tools & Technologies

- Flutter, Arduino IDE, Tinkercad
- Sensors, Servo Motor, LEDs, Buzzer

INTERESTS

Problem-solving, learning programming, reading the Quran.

PROFESSIONAL SUMMARY

Computer Science student focused on programming, problem-solving, and applying academic knowledge through practical projects. Interested in organizing data and developing useful technology solutions. Committed to continuous learning, improving technical skills, and building a strong foundation in Data Engineering.

EDUCATION

Computer Science — KFS

Level 3 • 2024–2028 (Expected) • GPA: 3.26

TRAINING EXPERIENCE

Digital Egypt Pioneers Initiative (DEPI) — Trainee

Participating in technical training and continuing to develop programming skills, technical knowledge, and professional capabilities.

College Summer Training

- Mobile Application Development — 60 training hours.
- AI — 60 training hours.

Academic projects were developed individually under the supervision of department professors.

PROJECT EXPERIENCE

Uni_Guide App | Dart, Flutter

- Organizes access to courses and curricula.
- Includes assignment/task tracking and notification reminders.
- Provides a student profile and GPA-tracking dashboard.
- Developed individually during college summer training under department professors' supervision.

AI-Based Smart Irrigation System | Arduino, C#, Tinkercad

- Monitors soil moisture, temperature, ambient light, and water-tank level.
- Controls a servo motor to activate irrigation when configured sensor conditions are met.
- Uses LEDs and a buzzer to signal low water levels.

Components: ultrasonic sensor, temperature sensor, LDR, soil-moisture sensor, servo motor, LEDs, buzzer.

EDUCATION

Computer Science

KFS • Level 3

2024–2028 (Expected)

GPA: 3.26

TRAINING

Digital Egypt Pioneers Initiative (DEPI)

Trainee

College Summer Training

Mobile Application Development — 60 hours

AI Training — 60 hours

LANGUAGE

English — B1 (from previous CV; please confirm)

PROFESSIONAL FOCUS

Developing programming skills and building a foundation in Data Engineering.

PROJECT EXPERIENCE — CONTINUED

SQL Database

Additional project entry. Detailed description can be added once the implementation and features are confirmed.

TECHNICAL PROFILE

Programming & Computer Science

Python, Dart, C#, OOP, Data Structures, Prolog, algorithms, problem-solving, and logical thinking.

Web & Databases

HTML, CSS, SQL, database fundamentals, and data organization.

Mobile & Embedded Systems

Flutter, Arduino IDE, Tinkercad, sensors, servo motor control, LEDs, and buzzer.

ADDITIONAL INFORMATION

- Interests include problem-solving, learning programming, and reading the Quran.
- Professional focus: developing technical skills and building a foundation in Data Engineering.
